

Crocus for the window

Make a little "garden" for your windows this spring.
Make the pattern as foundation piecing. Make two parts – the same colourway.
Cut out with a seam. Cut two pieces of cardboard after the pattern. Put a little glue on the cardboard and then place the sewn part on top. Fold the seam around the cardboard. Hold the two halves together with a paperclips. Sew with small stitches around the sides.
You can if you like make a little piece of batting (thin) after the pattern and put this between the cardboard and the fabrics to make a little more volume and to make it look "softer".
Put a thread in the top and hang up

Good luck
